Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-28, 31-43, drawn to a method comprising: associating a plurality of tokens with a financial account by recording the plurality of tokens in a token log, which token log is accessible by an institution that is responsible for authorizing one or more transactions involving the account; and initiating a transaction involving the financial account by providing one of the tokens and an indication of the account to a vendor, wherein the vendor is to provide the token, the indication of the account, and information about the transaction to the authorizing institution, which authorizing institution provides the vendor with transaction authorization based on the token being found to exist in the token log., classified in class 705, subclass 40.
- II. Claims 29-30, drawn to a method comprising: receiving transaction information from a vendor, which transaction information is not accompanied by a token; associating the transaction with a special token that is designated for transactions that are not otherwise accompanied by a token; checking the special token against information in a token log in order to verify that the transaction is authorized and within one or more

conditions associated with the special token, classified in class 705, subclass 75.

2. The inventions are distinct, each from the other because of the following reasons

- Inventions I and II are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I relates to a method of associating a plurality of tokens with a financial account by recording the plurality of tokens in a token log, whereas invention II has a different utility and scope of receiving transaction information from a vendor, which transaction information is not accompanied by a token; associating the transaction with a special token that is designated for transactions **that are not otherwise accompanied by a token**. Hence invention I has a different utility and scope than invention II. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II Restriction for examination purposes as indicated is proper.

3. Applicants are advised that reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
